EDUCATION

PhD in Economics

2021-present

Collegio Carlo Alberto - University of Turin

My research areas concern Development and Environmental Economics. Specifically, I am currently interested in the impact of climate change on developing countries and I got passionate of various policy evaluations/econometric models used to estimate the energy transition, especially through geo-spatial analyses.

MSc. in Economics, 107/110

2019-2021

Alma Mater Studiorum - University of Bologna

Rigorous training in economics with a research-oriented approach. Strong command of micro- and macro-economic theory and of techniques for quantitative analysis. Acquisition of team-working, individual research and IT programming skills through weekly time-constrained assignments.

B.Sc. in Economics, Markets, Institutions, 107/110

2016-2019

Alma Mater Studiorum - University of Bologna

Acquisition of a large number of theoretical and analytical tools for economic and financial analysis. Solid training in theoretical and applied economics, multidimensional approach to problem-solving, acquaintance with methodology and techniques of law, political science and economic history.

Scientific Lyceum Diploma, 82/100

2010-2016

Liceo Scientifico Livio Cambi, Falconara Marittima (AN), Italy
